Industrial

## KEY FACTS

- ▶ **Maintenance free**  
For simple, low cost of ownership
- ▶ **Large filter area**  
Provides a long service life and high dust holding capacity
- ▶ **No dust break through**  
For assured performance
- ▶ **Patented, flexible pleat distance holders**  
Allows a uniform air flow across the filter surface
- ▶ **Free from metal and fully incinerable**  
For easy, environmentally friendly disposal

**Macrofalt is used in air conditioning applications when optimisation of air filtration to a small area is required. A compact construction with a height of only 48mm, a large filter area and high dust holding capacity, are key features of this filter. The ratio of filter area to face area is: 13:1 – a value rarely found in competing filters.**

Macrofalt filters have been tested at an independent laboratory and reach the filter classes G4 and F5 according EN779 and are suitable to VDI6022.

## Construction

Macrofalt consists of well-established, nonwoven technology of different filter efficiencies. The media is pleated at optimised distances and fixed with flexible distance holders according to a patented technique. With this process filter packs are generated which will be fixed in the plastic frames tightly and provide an excellent seal.
