Construction

Each bag has three layers, a prefilter which promotes dust loading, a fine filter and a final layer which prevents fibre migration. The bags are assembled in modules, each consisting of two bags permanently bonded into a coated mild steel header. Modules simply clip together down each side to provide positive sealing.

Temperature & Humidity

Maximum working temperature (continuous): 120 °C

Maximum relative humidity: 100%

Pressure Drop

Maximum recommended final: 650 Pa
