

VOKES FILTRATION

Vokes Air Group has been supplying liquid and air filtration systems worldwide for more than 30 years. Vokes Filtration is now an independently women-owned company, whilst still having strong ties with the Vokes Air Group. We pride ourselves in providing industry leading products and services.

Vokes Filtration is a South-African company with market leading expertise in all aspects of HVAC systems, Dust Extraction systems and Liquid Filtration systems. With our extensive range of Liquid, Dust and Air products, we can select and provide the best performing filters for your needs.

Our mission is to become the premier filter supplier throughout Africa. We are dedicated to building long-term relationships with our customers through quality products and the best quality service available. By offering superior customer service, we at Vokes Filtration distinguish ourselves from our competitors. Our team is passionate about our business and we intend to maintain our enthusiasm through constant product training and skills development. We have recently included value added services such as installation, validation and waste disposal for all of our products.

Our product range includes:

- ☞ Vokes brand pre-, secondary and HEPA filters
- ☞ Vokes brand coalescer systems
- ☞ Oil mist eliminator systems
- ☞ Plenty brand liquid and gas filtration systems
- ☞ Scandmist systems
- ☞ Streamline insulating oil treatment systems
- ☞ Hascon brand dust extraction systems

Vokes Filtration's core strengths and competencies lie in the quality products we supply that can have a positive impact on reducing energy usage and lowering your carbon footprint, thereby lessening the environmental impact on the world.

With the international backing of the Vokes Air Group and their fully equipped laboratories, our products are guaranteed to be at the fore-front of filter technology. The facilities both locally and abroad allow us to constantly re-evaluate our portfolio and therefore design new, innovative products which perform at the highest levels in the required environment.

In addition to new product development, the R&D laboratories have extensive quality testing facilities to ensure that our products perform to the highest levels you would expect from a Vokes Filtration filter. Each state of the art piece of equipment helps to accurately simulate a variety of real-life operating conditions to ensure that our products perform to the highest standard, even in the most extreme environments.

We strive to provide quality products that meet the latest international standards at competitive prices with excellent service. Customer satisfaction is at the forefront of our operations.

PRODUCT RANGE

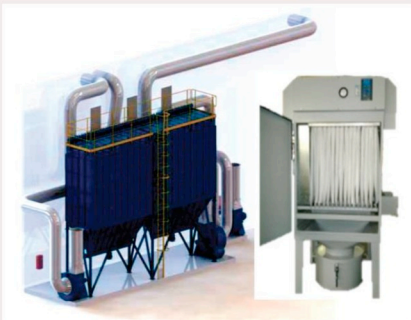

AIR FILTRATION

From coarse dust filters through to the latest laminar flow operating theater filters, our range of air filtration solutions has been designed specifically to meet the exact requirements of our customers, no matter what field of application or the operating environment.

STRAINERS

Strainers remove unwanted particles from a pipeline flow. Furthermore they are relatively inexpensive compared to the equipment they protect or compared to the downtime, inferior product, or loss of production if they were not doing their job in the piping system.

DUST HANDLING

Designing and manufacturing air de-dusting and filtering systems for environmental preservation, working in tight cooperation with the customer to achieve maximum value in terms of technology, reliability and service.

OIL TREATMENT PLANTS & OIL MIST ELIMINATORS

The Stream-Line® Oil Treatment Plants have been manufactured for over eighty years and are in service with power generating, transmission and distribution authorities in over sixty countries worldwide. Proven to be extremely efficient and economical to operate, continued research and development by VOKES means that Stream-Line® plants are still the most effective method of oil treatment available.

OIL MIST ELIMINATORS

A new generation of Industrial Air Cleaners that efficiently separate oil fumes, oil mist and emulsion mist.
